## COMPANY FEATURE: THABISO GLASS FIT

Situated in Bathlaros at the NWDC Bathlaros Small Industries is Thabiso Glass Fit, a thriving business in the Dr Ruth Segomotso Mompoti District, close to Mothibistad.

Owned by Thabiso Tities, this business has existed for a period of six years and not only provides glass for frames but manufactures the window and door frames as well.

Born and bred in Mothibistad, it has always been Thabiso's dream to own his own glass fitting and manufacturing company. Having worked extensively for high profile companies such as PG Glass and Glassfit, Thabiso realised that glass will always break at some time or the other and would have to be replaced. Identifying a niche in the market in Bathlaros, he took a leap of faith and started the process of achieving his dream.

Thabiso approached SEDA for funding which he received and sometime thereafter took out a loan from Anglo American for additional equipment and materials. Soon enough Thabiso Glass Fit became a reality.

Thabiso's observant relationship with his clients made him realise that more and more people were moving away from steel structures, rather preferring aluminum. This prompted Thabiso to include the manufacturing of aluminum door and window frames in his basket of products.

Thabiso Glass Fit is currently the only glass fitting and doorframe manufacturer in Batlharos. Marketing by word of mouth and issuing out business cards and flyers has helped introduce this business to the vast communities in the area.

A quote says, "Behind every successful man, is a woman". This rings very true in this case. Thabiso has the full support of his wife Dikabelo, who works side by side with her husband. Together they are living their dream of owning their own business.
