**“We always provide quality, we have pride in our work”**

**Morwe Civil Constructors (Pty) Ltd** is a company that has recently emerged onto the construction scene.

Situated in Lokaleng Village in the Ngaka Modiri Molema district, this newly registered company belongs to Thatoyaone Morwe, a young man whose dream has become a reality.

**Thatoyaone Morwe**

As a young man, Thatoyaone started his career working for some of the larger construction companies where he gained the necessary skills required to realise that construction was his passion. Not one to let obstacles stand in his way, he went on to open his very own company where clients purchase the necessary building materials required for what they would like to have done. Morwe Civil Constructors, together with their project manager, Lebogang Mogau then executes the work required.

Working together with their clients to achieve exceptional results, this committed team will deliver the highest quality of work whilst ensuring that deadlines are met.

Thatoyaone's future plans entail moving from residential to commercial as the business grows and opening up branches in other areas. As he wisely states: **“If you believe in yourself, nobody can stop you”.**
