Mogwase Landfill

About **SERIOUS BUYERS**

**Prominent buyer of recyclables
and emerging waste management
company.**

We specialize in a wide range of waste management services, including residential waste collection and transportation, custom waste management plans for private companies, recycling, cleaning of illegally dumped refuse, litter picking, and organizing cleanup campaigns.

**Helping local businesses to legally and
responsibly dispose of their waste.**

RECYCLING AS A COMPONENT OF WASTE MANAGEMENT

While recycling is a valuable part of waste management, it does not encompass the entire waste management process. The primary role of recycling companies is to reduce the amount of waste sent to landfill by recovering and reusing materials.

However, businesses remain responsible for the disposal of any waste that cannot be recycled.

For example, if a business initially has 3 tonnes of waste requiring disposal, and 2 tonnes are recyclable, they would only need to pay disposal fees for the remaining 1 tonne.

Therefore, while recycling reduces landfill waste, it does not eliminate the responsibility or cost of properly disposing of the non-recyclable portion.

Corporate **WASTE MANAGEMENT**

We assist companies and institutions in complying with waste management regulations and disposing of waste responsibly. Many institutions and companies in the Moses Kotane Local Municipality struggle to meet compliance standards, and often face conflict with regulatory bodies which can sometimes be costly.

Our services include removing of accumulated waste and ensuring its proper disposal, helping businesses avoid non-compliance issues.

We provide a dedicated personnel to your waste site to manage and handle your waste in real-time insuring your workplace remains consistently clean, organized and free from waste build-up.

For each load disposed of, we provide a landfill disposal receipts to support your waste audit and documentation requirements.

LET'S TALK RECYCLING

Approximately about 70% of domestic waste is recyclable, presenting a substantial cost-saving for companies that partner with us. By focusing on recycling rather than conventional waste disposal methods, companies can reduce landfill expenses and lower environmental impact.

Our recycling activities are designed to maximize these benefits by identifying and separating recyclable materials from general waste,

ensuring that only non-recyclable waste is sent to the landfill.

Whether you are a retailer, landlord, a manufacturing company, or industrial company, we work closely with you to develop a customized recycling solution.

Our team will identify markets for your recyclable materials, providing you with efficient, cost-effective waste management strategy.

WHAT DO WE RECYCLE.

01 PET & HD BOTTLES

The technical term for your cold drink and milk bottles.

02 TETRA-PAK

This is mostly used in milk and juice packaging.

03 ALUMINUM CANS

This remains most common in packaging with high recycling rate.

04 WHITE PAPER

Consist of coated groundwood free paper. Printed or unprinted sheets, shavings, guillotined books and cuttings.

05 CARDBOARD

We focus on corrugated, paperboard and chipboard

06 CLEAR & MIXED PLASTIC

We take most plastic as clear, shrink or mixed colours.
